

CSCW Using CSCW Sept 16th, 1997

Hi

I hear you fine, but can't get my mike to work (JL)

Just a reminder, remote participants can use the MASH session
media-board for quality feedback – Angie

Is sound coming across to others? I can hear what amounts to static. (RW)

I've got sound that's fine. Angie

Hmm, it drifts in and out. Probably bandwidth --I'm at home on an ISDN line.

Elan had some advice for you, I think he's e-mailing it – Angie

**I tested the mike but am getting
terrible feedback with my speaker. -- Marti**

Robert, this is Elan: in the vat menu – choose 'gsm' as your format.

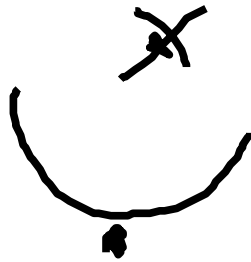

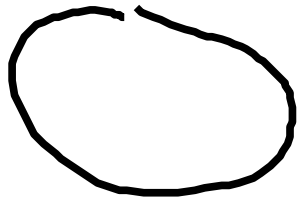

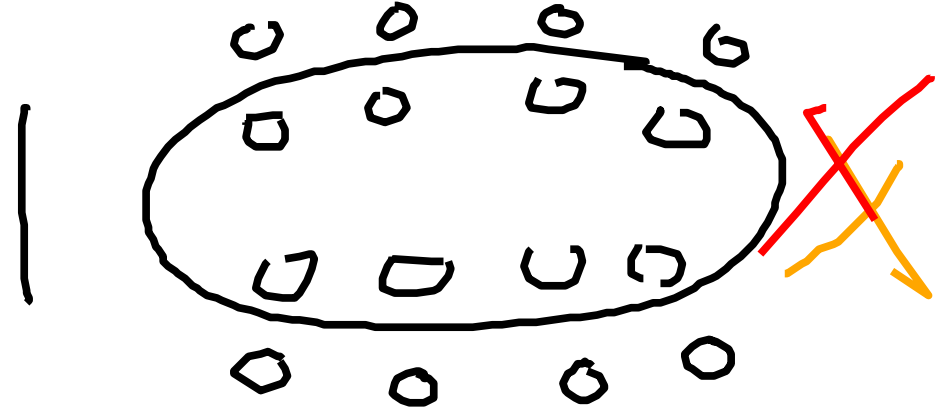

Thanks. Will try.

Hmm. Set that, but sound faded out completely beforehand,
and changing the setting didn't restore it.

Can you hear me? I just tried out the mike.

CSCW using CSCW Meeting Support Systems

Mechanisms

Policies-

Interactive, Designated Scribe,
Rotating Scribe

I'll Get That Off the Audio

- Took about 2 years to evolve new behavior
- Become a "channel"
 - More diverse opinions
- One person studied — valid?
 - "Invalid but realistic"
- Doesn't include C's final opinion
- Designers may not have known what "expert usage" is

CMC Requirements for Group Support

EIES2, TEIES

www.njit.edu/CCCC/

Conferences

Activities

Notifications

Roles, Privileges, Tickets

OODB

Too explicit

Inflexible

Doesn't seem easy to use

Right up IBM's alley

BUT

Forward thinking for 1989
Focus on asynchronous
where lots of stuff happen

Integrate meeting and asynchronous software

CMC @ NJIT

Important paper because

- Notion of roles
- Enumerates "all possible" behavior

**Several people are describing very bad audio quality,
Teck could you check out the MASH mb session when you have a chance**
